Good afternoon!

After tallying the Green School Application Questionnaire, we wanted to share some information with you. We surveyed approximately 50 teachers and found:

48% of our teachers teach environmental themes in the classroom.
25% of our teachers have completed some sort of professional development with an environmental theme.
27% of our classes celebrate being environmentally aware.

Thank you for all the hard work you do to promoting a green and sustainable environment!

If you're interested in learning more about how to incorporate more environmental themes in your classroom, please contact one of the Green Leaders, Ms. Davis (sqdavis@bcps.k12.md.us), Ms. Melton (amelton01@bcps.k12.md.us), or Ms. McDonald (MEMcDonald@bcps.k12.md.us)
